ABSTRACT

ENZYMES AS CORROSION INHIBITORS BY REMOVAL OF OXYGEN DISSOLVED IN WATER

5

10

The invention relates to a new process for water deoxygenation, for application in aerosol products. The process involves the use of an enzymatic system based on an oxidase enzyme a substrate for the oxidase enzyme and catalase. These two enzymes consume oxygen by a two step reaction with the substrate and hydrogen peroxide, which is formed in the first reaction.
